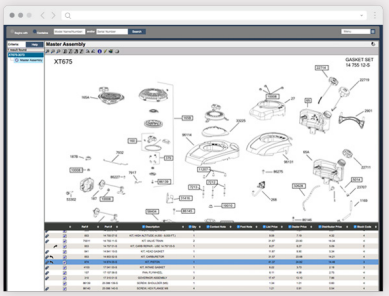
Handy Online - PARTSMART WEB

Streamline your Parts ordering.
Our fast and reliable eCatalog web portal ensures you can quickly and accurately find the right part the first time.

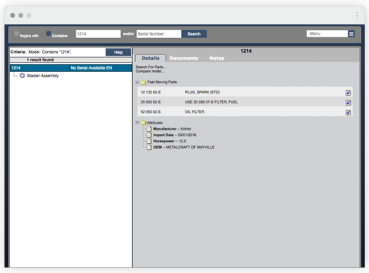


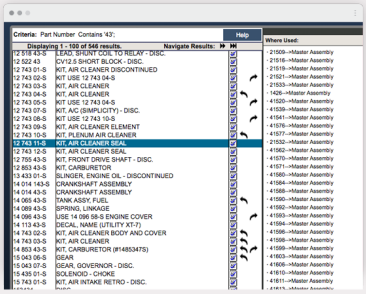
Simplify Replacement Part Ordering

The PartSmart Web gives you exclusive access to your electronic catalog content. Paired with our internal systems, you can ensure you have real-time access to your latest replacement parts content.

Find Parts Easier

We've tried to make it simple for you to find the right part the first time with the ability to search by part number, description, or model number to fine-tune your search with access to rich data including supercessions and parts kit information.



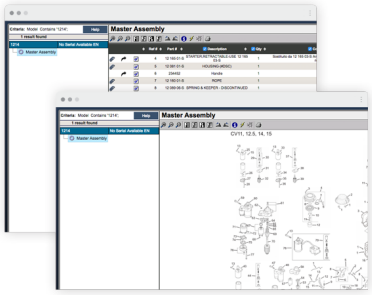


Locate Where Parts Are Used

You can simply search an entire catalog to find the models/components where a part is used. PartSmart Web shows dealers which diagrams contain the parts, so they can accurately determine how many to order. They'll also be able to view important supplier notes and bulletins attached to models, components and part numbers.

Customise How Data is Displayed

You can still customise the way you view parts information: see part numbers and illustrations together or separately, view an entire illustration or zoom in on a particular area to improve detail. You can also print full images or zoomed-in views of illustrations or part lists



This feature is open to all dealers who have a Credit Account with us.
To find out more contact your local Handy Distribution Sales Representative.

The use of a trade name in relation to Handy parts is not to be taken as any indication that such parts are made, marketed or warranted by any other party.
